B&C signed up to the FWF's Code of Labour Practices in 2009, and thereby committed to adhere to these labour standards in their own business operations. The Fair Wear Foundation (FWF) exists to promote fair labour conditions in the garment industry worldwide and to supervise audits internationally. The Fair Wear Foundation verifies that the Code of Labour Practices is implemented and respected at the factories. By becoming a member of FWF, we committed ourselves to implementing and maintaining a Code of Conduct designed specifically for the garment industry. This Code of Conduct is based on the Conventions of the International Labour Organization and the Universal Declaration of Human Rights.

### This includes the following standards:

- No use of child labour,
- No use of forced labour,
- Safe and healthy working conditions,
- Legal labour contract,
- Payment of a living wage,
- Freedom of association and the right to collective bargaining,
- No discrimination against workers,
- No excessive working hours.

## OEKO-TEX® STANDARD 100

It certifies that raw materials, intermediate and end products at all stages of production contain no substances harmful to people or the environment. Test criteria are standardised across the world and include tests for pH-value, pesticides and heavy metals. B&C RING-SPUN

## B&C RING-SPUN QUALITY

### RING-SPUN YARN

The long fibres are tightly twisted together (parallel, in the same direction), which results in a stronger, cable-like yarn. Ring-spun yarns ultimately yield a smoother, more durable fabric.

*Finer, smoother, consistent knit.*

### OPEN-ENDED YARN

With shorter fibres than ring-spun cotton, the fibres are wrapped around each other, resulting in a loosely bound, thicker yarn. Open-ended yarns often result in fabric with a rough hand.

*Bulky, fuzzy, uneven knit.*

## PREMIUM FABRICS LEAD TO PERSONALISATION EXCELLENCE

*We're inspired by your business and this drives us to bring you the best - whatever style you choose; you can trust in B&C quality.*

*We take great care in the choice of all of our fabrics. Not only must they complement the styling of each garment and ensure the wearer the highest level of comfort, they must also deliver the best results in decoration.*

From T-shirts to jackets, from softshell to denim, we test all our fabrics with various decoration techniques so you can be confident that whenever you choose a B&C style you will have the perfect support for your brand or message.

## B&C RING-SPUN EMBRACES OUR WHOLE COLLECTION

All B&C Collection T-shirts are made of **RING-SPUN COTTON**, which is softer and smoother, both inside and out.

Why settle for poor quality when you can have the look and feel of retail? 100% ring-spun cotton fabric screen-prints better, heat transfers better, embroiders better and wears better.

### HIGH QUALITY POLO SHIRTS ENHANCED WITH B&C FINE PIQUÉ

B&C Polo shirts set the standard in the market, thanks amongst other things, to the superior quality **B&C Fine Piqué**, made of 100% ring-spun **combed** cotton. The unique superior quality B&C Fine Piqué has an ultra-fine honeycomb structure, giving a perfectly smooth surface for decoration without compromising on softness or durability. More on page 182.

### PURELY RING-SPUN, INCREDIBLY SHIRTS

A shirt is in direct contact with your skin for more than 8 hours every day; this is why we can't compromise on quality. Choosing the finest fabric is the starting point of what makes our shirts special. Designed to complement any corporate uniforms, B&C shirts are made of **combed** ring-spun cotton, even when the composition is blended. Our highly qualitative and contemporary shirts offer comfort, perfect appearance, and everyday ease of care.

### SWEATSHIRTS COMFORT, APPEARANCE AND PRINTABILITY TO THE HIGHEST LEVEL

Even when we use a polyester blend, all our sweatshirts too are made of ring-spun cotton and with the PST sweatshirts, you get the best fibre: B&C **combed** ring-spun cotton. We want our sweatshirt to deliver the same softness, durability and enhanced printability as our T-shirts, so we make no compromises on the choice of fibre. Offering a truly luxurious handfeel, the exclusive **B&C Perfect Sweat technology** was developed to offer you all the benefits of combed ring-spun cotton, but with the added durability and stability of polyester. More on page 256.

### B&C OUTERWEAR UNIT: DURABLE, COMFORTABLE AND VISIBLE

Following the same vein, all fabrics of our B&C Outerwear Unit styles are carefully selected to provide the best and easiest print result. All our jackets also have easy access for decoration.

## COLOUR MAGNETISM

Certain colours are said to change the way you feel.

Green, for instance, can make people hungry – which might explain why everyone loves to picnic in the park. And if you wear a mood ring, it tells the world exactly how you feel – sea green signifies relaxation, dark blue implies passion, pink that you are inspired or orange optimistic. By the way, if you find a red feather, it means you have good fortune. So we wanted to find out what happens when you throw pigments of colour in the water.

Look at that. Purely magnetic, right?

With the **extensive colour offer of the B&C T-shirts**, select your coolest colour and provide maximum attractiveness to your message.

If colour is key for your message, the quality of the decoration is a must. Check our Fabrics and Printability Excellence at the end of this chapter (p.167).

# B&C CORE ATTITUDE OFFER

When value is key and you want to stay simple, the CORE line of B&C T-shirts is there for you. This line of 22 T-shirts includes core styles, such as the iconic B&C #E line or 14 women, men, fitted or not, sporty or urban styles. This line is exclusively made of 100% RING-SPUN cotton fabric and is produced with the highest attention to- and control of quality.

## THE B&C QUALITY

Soft, RING-SPUN COTTON and dense, compact knit are the key for the B&C Core T-shirts quality. Offering you the best printing surface with incomparable softness to the touch and comfort, it's the market reference. And this quality comes in an ASTONISHING range of colours!

Exactly what you were looking for!

# MY FAVOURITE SUBLIMATION T-SHIRTS

## PRINTABILITY

Sublimation is a dye-printing technique that allows for your ideas to be displayed at their maximum potential. It frees your creative mind and allows “all-over” prints. You will be able to translate your emotions without technical boundaries. Sublimation produces: super bright designs and bold colours that look like a photograph, the designs do not fade away easily, the prints do not have texture and are weightless (as inks directly dye the fibres). If those T-shirts are the best support for the sublimation technique, they are of course also a perfect support for screen-printing (use polyester targeted inks) or embroidery.

## STYLE

Your customers will love the modern look and versatility of the B&C TM062-TW063 Sublimation polyester Tee, and the soft hand of the sublimated prints on it. With its cool and comfortable fit, this duo has a fantastic drape due to its polyester composition, and an ultra soft-to-touch feel due to the quality of the fabric we developed for you.

## EASY BRANDING SOLUTION

To perfect your customisation

B&C Inspire line, the B&C Sublimation and the B&C Triblend tees have no brand label located in the collar and, to make your life easier, a size chip only.

To optimise efficiency when sorting your T-shirts, we differentiated men/unisex and women styles. For men and unisex styles, size chips have a black background when for women fits they have a white background.

This easy branding solution allows you to complete the customisation of your T-shirt.

With B&C No Label Tees, **the UNIQUE and fully personalised T-shirt line you are dreaming of is already waiting for you.**

*To enable you to follow all EU regulations, the composition label (complying with mandatory information and EU languages rules) is located on the left side seam of the style.*

## FABRICS & PRINTABILITY EXCELLENCE

75 colours & 9 fabrics to be customised

-  
**ONLY  
THE BEST**  
-

In order to give you the best support for your campaigns, B&C offers you a wide range of 9 different fabrics. Easy to print, comfortable to wear, soft to touch, yet durable, those are the main qualities of all those B&C fabrics. Our B&C unique fabrics will inspire you to be even more creative in your communication and to offer something different.

**The B&C Collection, the best choice to support your brand, creations, actions.**

PRINTABILITY  
EXCELLENCE

# QUALITY IS NOT A PRIVILEGE IT'S AN ATTITUDE

Our passion for quality knows no bounds, it is only matched by our drive to deliver the most inspiring contemporary collection for the promotional market. For us, every single detail needs to be absolutely perfect – from the colour and cut to the threads used to make the T-shirt itself.

## MEET YOUR FAVOURITE FABRIC

Anyone who has ever owned a T-shirt has had a favourite one that has stood out as the best shirt they've ever owned. It made them feel better, smarter and more at ease when they wore it. But what made it so fantastic? The secret is in the fabric. All 44 B&C Collection T-shirts are made of RING-SPUN cotton, which is softer and smoother, both inside and out.

All our T-shirts use pre-shrunk fabric, because we know you want your favourite T-shirt to keep its original shape and to last. All our T-shirts are dyed following a strongly controlled process, to ensure colour fastness, because you don't want your favourite T-shirt to fade out. All our fabrics are carefully chosen. They must be durable, comfortable, soft and with premium printability. To ensure this premium quality level, we run Quality Controls on a daily basis, directly managed by the B&C team in the factories, helped by the fact that we based one of our offices in Asia.

### RING-SPUN YARN

*The long fibres are tightly twisted together (parallel, in the same direction), which results in a stronger, cable-like yarn. Ring-spun yarns ultimately yield a smoother, more durable fabric.*

*Finer, smoother, consistent knit*

### OPEN-ENDED YARN

*With shorter fibres than ring-spun cotton, the fibres are wrapped around each other, resulting in a loosely bound, thicker yarn. Open-ended yarns often result in fabric with a rough hand.*

*Bulky, fuzzy, uneven knit*

## FIT AND STYLE

*Are you looking for the best T-shirt for your message/brand? Relaxed and comfortable, always soft and emotional, we have a large selection of T-shirts, tank tops, styles and cuts.*

*We always carefully balance the elements to find the right combination of weight, softness, price and fit, to support the expression of your creativity.*

## PERFECT DECORATION MEANS GREAT VISIBILITY

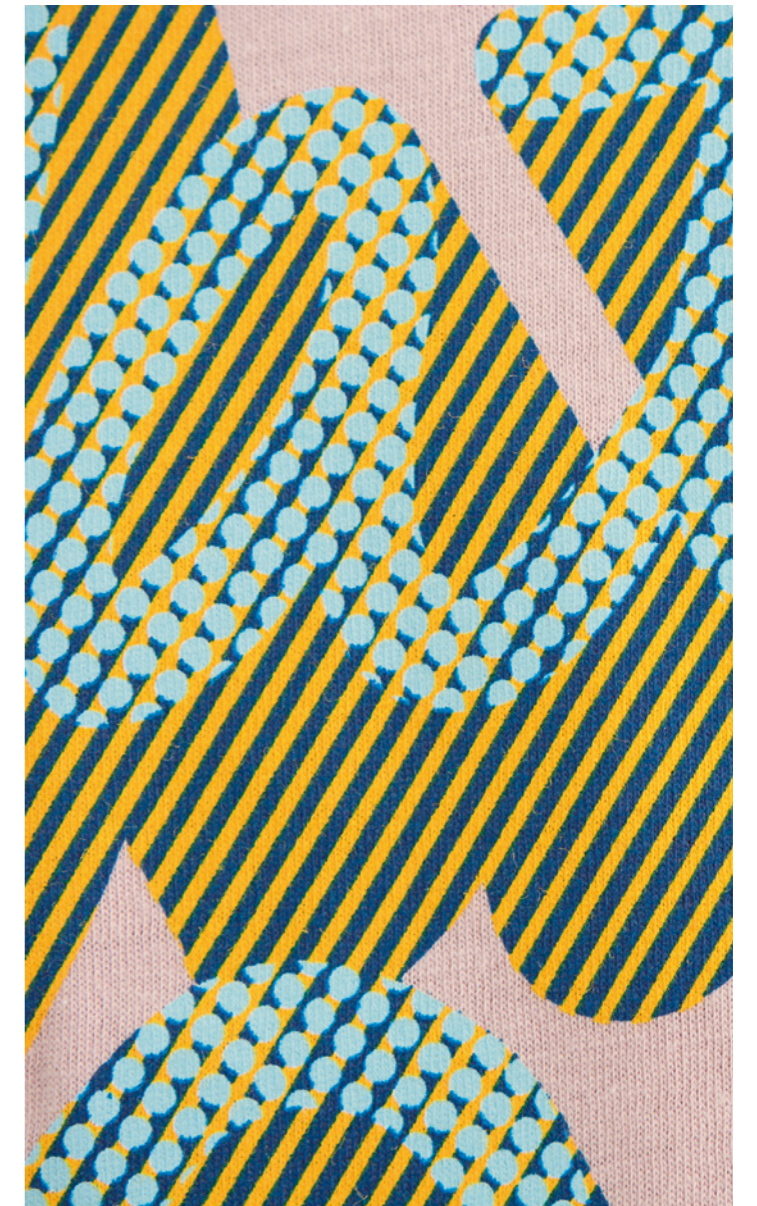

*We take great care in the choice of all of our fabrics. Not only must they complement the styling of each garment and guarantee the highest level of comfort to the wearer, they must also deliver the highest QUALITY results in DECORATION. We TEST all our fabrics with various decoration techniques so you can be confident that whenever you choose a B&C T-shirt, you will have the perfect canvas for your brand or message.*

*All B&C Collection T-shirts are made of ring-spun cotton, which is softer and smoother, both inside and out*

## RESULT OF REGULAR SCREEN-PRINT TEST

*Why settle for poor quality when you can have the retail look and feel? 100% ring-spun cotton fabric screen-prints better, heat transfers better, embroiders better and wears better.*

# THE SHIRT BUYER'S GUIDE

5 STEPS TO GET THE RIGHT SHIRT FOR YOUR BUSINESS

Choosing the right shirt is not always an easy task. You have many aspects to consider. Follow these 5 easy steps of the B&C shirts buyer's guide and get the right shirt uniform for your employees, whatever your business.

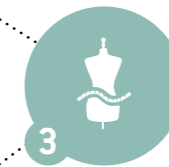

### CHOOSE THE TYPE OF FABRIC YOU NEED

Depending on how much physical activity your employees will be doing or the temperature they are working in, consider the kind of fabric that is the most suitable for their uniform(s). For example, polyester/cotton blend may be more durable and may be better for indoor, air-conditioned environments. Also, consider your employees and their busy schedules; make sure their shirts are easy to maintain. All B&C Shirts are easy care treated.

### PICK THE RIGHT COLOUR

From classic shades to brighter colours, B&C Shirts offer the right colour range to fit any business. In any case, when picking your logo or embroidery, make sure to get high contrast between the logo and the garment and that the logo is easily readable, especially from a distance.

### SELECT THE CORRECT SIZE

B&C Shirts are true to size, so you can order the normal clothes size and be confident that your team will be well dressed. To ease your size management, we have designed our shirts with a regular fit ensuring they suit a wide range of body shapes. Our wide size offer gives you the opportunity to have a full team uniform that is consistent in look, cuts and colours.

### BE CREATIVE, BE VISIBLE

Consider changing your employee's uniform based on seasons, such as darker shades for winter and a brighter colour and logo for summer. Changing up uniforms can add interest to your business and catch customer's eyes. Think about your employee' shirt uniform as a support of choice for your business visibility.

### OPT FOR THE RIGHT DECORATION TECHNIQUE

Embroidery may look best for a small logo on the front of the shirt. If you want a larger or all-over design, screen printing will be the best option. In any case, B&C Shirts are designed to be decorated and will give you enhanced printability.

## IGNORE THE WEATHER, ENJOY THE MOMENT

Working outside, cycling, climbing or just walking in the city, B&C Softshell jackets are ideal for a wide range of outdoor activities.

### WATERPROOF

Wet fabrics rob the body of warmth. By keeping water out, the durably waterproof B&C Softshell Jackets prevent heat loss, so the wearer stays dry and comfortable, whatever the conditions.

### WINDPROOF

Even light winds can penetrate most fabrics, this can be chilling and uncomfortable. Thanks to their inner membrane, B&C Softshell Jackets are windproof, to keep the wearer warm.

### BREATHABLE

Good insulation is also about ensuring that body moisture can effectively escape, keeping the wearer dry on the inside too. The breathable membrane at the heart of the B&C Softshell fabric ensures that moisture evaporates easily, even during exercise.

SOFTSHELL

## PERFECT PROTECTION

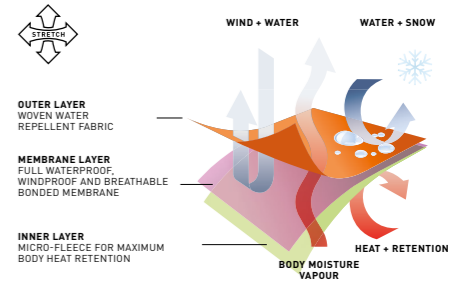

The strength of the B&C Softshell Jackets lies in their 3-layer construction. A waterproof, windproof and breathable membrane is bonded both to the outer fabric and the inner lining. The benefit: no movement between the layers, which means less wear and tear and enhanced durability.
